

Software Development, Vulnerabilities & Mitigation Methods: Questionnaire

Questionnaire Waiver | Details

The following questionnaire will ask questions pertaining to the subject of software development, vulnerabilities and mitigation. This section is just to ensure that you are aware that the information provided will be used in the production of an application and report and that you are fine with this.

Once completed the information, will not publicised, being shredded once used.

Tick Here ☐ to show that you are aware of the conditions above and ok with the use of said information supplied in the fields below.

¹Practitioners Details

| | | | |
|--------------------------------------------------------------|-------------|---------------------------------------------|---------------|
| Full Name | Dylan Royal | Level of Qualification | 3 |
| Age | 17 | Gender | Male |
| Main Field of Interest (Programmer, Cyber Security, etc.) | Programming | Are you currently employed? If so what job? | Sales Advisor |

²Queries

| | |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tick a box that you feel accurately describes software development . | <input type="checkbox"/> A framework that is used to structure, plan, and control the process of developing an information system <input checked="" type="checkbox"/> A process used by the software industry to design, develop and test high quality software's. <input type="checkbox"/> A meticulous and complex process to develop software, comprised of numerous stages. |
| What was the last big security issue/breach you were made aware of? | A terrorist attack |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Tick the Box you believe fully describes what a Vulnerability is.</p> | <p><input type="checkbox"/> System isn't behaving the way it's supposed to behave</p> <p><input checked="" type="checkbox"/> faults that may be exploited within a given system</p> <p><input type="checkbox"/> A method in which a system is breached</p> |
| <p>Are you aware of the issues of Vulnerabilities?</p> <p>If Yes could you please explain further, a brief few sentences explaining the issues of vulnerabilities.</p> | <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> |
| <p>Do you understand what a SQL injection is?</p> <p>If so please give a brief explanation below the tick boxes.</p> | <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> |
| <p>State in your opinion, two reasons as to why software vulnerabilities may occur in an Apple or Windows system.</p> | <p>1 <i>hacking</i></p> <p>2 <i>cyber bullying</i></p> |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tick one of the boxes that you think describe Mitigating Software Vulnerabilities . | <input checked="" type="checkbox"/> Reducing the chance of vulnerabilities <input type="checkbox"/> Finding Vulnerabilities <input type="checkbox"/> Fixing Vulnerabilities |
| Try to describe as many ways of mitigating issues caused by Software Vulnerabilities as you can. | Not sure |
| What Operating system do you normally use? If other write the OS below. | <input checked="" type="checkbox"/> Windows <input type="checkbox"/> Linux <input type="checkbox"/> Mac <input type="checkbox"/> Other |
| Explain a prior experience you have had with vulnerabilities in a system if any. Else Leave Blank. | lag |
| How would you rate 0-10 your knowledge of software Vulnerabilities ? Circle one of the options in the adjacent Box/Field. | 1 2 3 4 5 6 7 8 9 10 |

| <p>State in your opinion, two reasons as to why software vulnerabilities may occur in an Apple or Windows system.</p> | <p>1 Every program must occur in software vulnerabilities. But sometimes faults can be exploited.</p> <p>2 Internet access</p> |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tick one of the boxes that you think describe Mitigating Software Vulnerabilities . | <input type="checkbox"/> Reducing the chance of vulnerabilities <input checked="" type="checkbox"/> Finding Vulnerabilities <input type="checkbox"/> Fixing Vulnerabilities |
| Try to describe as many ways of mitigating issues caused by Software Vulnerabilities as you can. | Making ^{lots of} other people feel hurtful about others causing viruses to their system. |
| What Operating system do you normally use? If other write the OS below. | <input checked="" type="checkbox"/> Windows <input type="checkbox"/> Linux <input type="checkbox"/> Mac <input type="checkbox"/> Other |
| Explain a prior experience you have had with vulnerabilities in a system if any. Else Leave Blank. | |
| How would you rate 0-10 your knowledge of software Vulnerabilities ? Circle one of the options in the adjacent Box/Field. | 1 2 3 4 5 6 (7) 8 9 10 |

Software Development, Vulnerabilities & Mitigation Methods: Questionnaire

Questionnaire Waver | Details

The following questionnaire will ask questions pertaining to the subject of software development, vulnerabilities and mitigation. This section is just to ensure that you are aware that the information provided will be used in the production of an application and report and that you are fine with this.

Once completed the information, will not publicised, being shredded once used.

Tick Here ☐ to show that you are aware of the conditions above and ok with the use of said information supplied in the fields below.

¹Practitioners Details

| | | | |
|--------------------------------------------------------------|--------------|---------------------------------------------|---------|
| Full Name | Mike Watkins | Level of Qualification | 8. |
| Age | 46 | Gender | UNKNOWN |
| Main Field of Interest (Programmer, Cyber Security, etc.) | | Are you currently employed? If so what job? | LOCKER |

²Queries

| | |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Tick a box that you feel accurately describes software development . | <input type="checkbox"/> A framework that is used to structure, plan, and control the process of developing an information system |
| | <input checked="" type="checkbox"/> A process used by the software industry to design, develop and test high quality software's. |
| | <input type="checkbox"/> A meticulous and complex process to develop software, comprised of numerous stages. |
| What was the last big security issue/breach you were made aware of? | I cant recall of the name |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Tick the Box you believe fully describes what a Vulnerability is.</p> | <p><input type="checkbox"/> System isn't behaving the way it's supposed to behave</p> <p><input checked="" type="checkbox"/> faults that may be exploited within a given system</p> <p><input type="checkbox"/> A method in which a system is breached</p> |
| <p>Are you aware of the issues of Vulnerabilities?</p> <p>If Yes could you please explain further, a brief few sentences explaining the issues of vulnerabilities.</p> | <p><input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>Sw/1-1 - Not sure what this means? "Issues"</p> |
| <p>Do you understand what a SQL injection is?</p> <p>If so please give a brief explanation below the tick boxes.</p> | <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>When a SQL instruction is used to damage get data</p> |
| <p>State in your opinion, two reasons as to why software vulnerabilities may occur in an Apple or Windows system.</p> | <p>1. not upto date</p> <p>2. bad standards or not tested fully</p> |

| | |

|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Tick a box that you feel accurately describes software development . | <input type="checkbox"/> A framework that is used to structure, plan, and control the process of developing an information system |
| | <input type="checkbox"/> A process used by the software industry to design, develop and test high quality software's. |
| | <input checked="" type="checkbox"/> A meticulous and complex process to develop software, comprised of numerous stages. |
| What was the last big security issue/breach you were made aware of? | APPLE |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Tick the Box you believe fully describes what a Vulnerability is.</p> | <p><input type="checkbox"/> System isn't behaving the way it's supposed to behave</p> <p><input checked="" type="checkbox"/> faults that may be exploited within a given system</p> <p><input type="checkbox"/> A method in which a system is breached</p> |
| <p>Are you aware of the issues of Vulnerabilities?</p> <p>If Yes could you please explain further, a brief few sentences explaining the issues of vulnerabilities.</p> | <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If vulnerabilities are not identified then people who want to access something where there is a vulnerability can.</p> |
| <p>Do you understand what a SQL injection is?</p> <p>If so please give a brief explanation below the tick boxes.</p> | <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> |
| <p>State in your opinion, two reasons as to why software vulnerabilities may occur in an Apple or Windows system.</p> | <p>1 Testing of new code is not completed properly -</p> <p>2 New software is not update properly</p> |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tick one of the boxes that you think describe Mitigating Software Vulnerabilities . | <input checked="" type="checkbox"/> Reducing the chance of vulnerabilities <input type="checkbox"/> Finding Vulnerabilities <input type="checkbox"/> Fixing Vulnerabilities |
| Try to describe as many ways of mitigating issues caused by Software Vulnerabilities as you can. | Robust testing codes checked |
| What Operating system do you normally use? If other write the OS below. | <input checked="" type="checkbox"/> Windows <input type="checkbox"/> Linux <input type="checkbox"/> Mac <input type="checkbox"/> Other |
| Explain a prior experience you have had with vulnerabilities in a system if any. Else Leave Blank. | Internet banking hacked. |
| How would you rate 0-10 your knowledge of software Vulnerabilities ? Circle one of the options in the adjacent Box/Field. | 1 2 3 4 5 6 7 8 9 10 |

Software Development, Vulnerabilities & Mitigation Methods: Questionnaire

Questionnaire Waver | Details

The following questionnaire will ask questions pertaining to the subject of software development, vulnerabilities and mitigation. This section is just to ensure that you are aware that the information provided will be used in the production of an application and report and that you are fine with this.

Once completed the information, will not publicised, being shredded once used.

Tick Here ☒ to show that you are aware of the conditions above and ok with the use of said information supplied in the fields below.

¹Practitioners Details

| | | | |
|--------------------------------------------------------------|----------------|---------------------------------------------|------------------------|
| Full Name | Peter Sides | Level of Qualification | N/A |
| Age | 59 | Gender | male |
| Main Field of Interest (Programmer, Cyber Security, etc.) | Mobile & Sport | Are you currently employed? If so what job? | Part time Sales person |
